## Student-friendly Security

---

Synthesis Architects serves New York State public school and higher education clients. We are committed to creating environments that enhance the quality of our urban, suburban and rural communities and improve the way we learn, work, play, and live our lives.

Our mission is to ensure client success by developing appropriate, student-focused designs, built on sustainable practices and designing environments that provide for:

- *more effective teaching,*
- *more engaged learning,*
- *more productive workplaces, and*
- *enhanced quality of life.*

21st Century learning environments

Secure entries that are student friendly environments

Inspired facilities that create a sense of place and instill student, staff and community pride

Artfully introducing contemporary programs to treasured older structures

Supporting student performances with state-of-the-art facilities

Restoring grandeur to aging community spaces

Providing learning environments that support the process and presentation of the arts

Community entries which support their civic purpose

Valuing the student by providing non-institutional dining facilities
